Course Title: **Philosophy Applied: ICA Philosophy Council Annual Conference**
Instructors: Joe Stevens, DC, ACP, DPhCS; Lyle Koca, DC, ACP, DPhCS; Rob Sinnott, DC, LCP, DPhCS; Brad Poock, DC, LCP, DPhCS; Jason Louie DC, SCP, DPhCS; Patrick Montgomery, DC, LCP; Tim Gross, MS, DC, LCP; Kathleen Carten, DC, LCP, DPhCS; Dan Lyons, DC, LCP, DPhCS; J. Richard Burns, DC, LCP, DPhCS
Course Objective: The objective is to show how understanding chiropractic's philosophy changes how chiropractic is applied in a practical setting. We aim to show how understanding chiropractic's philosophy improves patient results. To teach vertebral subluxation from a philosophical perspective. To explain how a deeper understanding of vertebral subluxation can lead to a better more complete analysis. To make the correlation between understanding vertebral subluxation at a deeper philosophical level and the results that you see in practice. We will examine in detail the components of vertebral subluxation and its relationship to chiropractic philosophy. We will correlate how those components are found in an analysis of a patient and how the details impact the clinical care the patient may receive. We will be defining the mental impulse and discussing how it relates to vertebral subluxation. The summary of this course is to show how understanding of chiropractic's philosophy offers a tool to teach and educate patients to provide better results. A postgraduate examination of what chiropractic's philosophy has to say when describing innate intelligence. We will then make the knowledge practical and discuss how we can better work with the intelligence of the body when providing care. One of the objectives will be to explore the topic of adaptability as it relates to chiropractic philosophy. We will show how measuring adaptability plays into the analysis of the health of a patient. We will then look at tools and methods in which to do this in practice. This course will discuss adaptation as it relates to health and chiropractic philosophy. We will make a practical connection as we look at how adaptability impacts a patient's overall health.
Dates: October 14-15, 2023
Location: Logan Univeristy 1851 Schoettler Road Chesterfield MO 63017
Total Hours: 12

<u>Saturday; October 14</u>

8-9:30AM

Why Philosophy Matters

A postgraduate review of the relationship between chiropractic's philosophy and its application in clinical practice. We will give real examples of how understanding chiropractic's philosophy impacts on clinical practice. is run and how successful it is. We will explore how a better understanding of chiropractic and it's philosophy can create better health for one's patients clinical outcomes.

- Discuss Why Philosophy matters in clinical practice.
- The philosophical impact of specific chiropractic care.
    - How that impacted results with patients clinical outcomes

1.5 Hrs. CE, Lecture, Philosophy **J. Stevens, DC**

9:30-10:30AM

Knowing what you are looking for

The Purpose of the course is to define Vertebral Subluxation at a philosophical level in order to give more depth and understanding. We will then show how that changes how we practice in a clinical setting.

- The Vertebral Subluxation defined
- What does Chiropractic's philosophy say about the vertebral subluxation
- How do we put that together with our chiropractic analysis

1 Hr. CE, Lecture, Philosophy **Jason Louie, DC**

10:30-11:30AM

The Chiropractic Philosophy of Logan Basic Methods

- Conviction of chiropractic's philosophy and how it should be applied
- Understanding of chiropractic's philosophy
- How that understanding ties into the Logan technique

1 Hr. CE, Lecture, Philosophy **Patrick Montgomery, DC**

11:30-12:30PM

The Mental Impulse

- To define and teach what a mental impulse is based on chiropractic's philosophy. To look at how a mental impulse can be impacted by vertebral subluxation. To make the connection between understanding a mental impulse and how that understanding helps in chiropractic analysis of a patient in a clinical setting.
- The mental impulse defined
- How that ties into the science
- How we apply what we know about the mental impulse in a practical clinical setting

1 Hr. CE, Lecture, Philosophy **Brad Poock, DC**

12:30-2:00PM **LUNCH** **NO CE**

2-3PM

Intention in chiropractic clinical practice

- The objective of this course will be to discuss Intention as it relates to chiropractic philosophy.
    - Why we need philosophical chiropractic education
    - The current state of philosophical chiropractic education
    - Ways that we can be philosophically Intentional

1 Hr. CE, Lecture, Philosophy **Tim Gross, DC**

3-4PM

Sharing Chiropractic's Philosophy

- The objective of this course will be to discuss how chiropractic's philosophy can be shared with patients more effectively and efficiently. A person's understanding of chiropractic and their own health play a big role in results and patient compliance.
    - How a better understanding of chiropractic's philosophy can lead to better patient understanding and education
    - How that understanding impacts their care

1 Hr. CE, Lecture, Philosophy **Dan Lyons, DC**

4-6PM

The philosophy of congruency in practice

- The purpose of this course is to show how to use your understanding of chiropractic's philosophy and your congruency in practice can lead to better results for better clinical outcomes.
    - Why understanding philosophy matters in chiropractic
    - What being congruent looks like
    - How philosophy impacts your clinical practice
    - How philosophy impacts your patients clinical outcomes

2 Hrs. CE, Lecture, Philosophy **Richard Burns, DC**

<u>Sunday; October 15</u>

8-9AM

- **Understanding Innate Intelligence and it's Vital Impact in Patient Care**
  Innate Intelligence plays a vital role in how the body functions. We aim to explore the characteristics of Innate intelligence at a practical level. We will look at how we can work with the intelligence of the body when analyzing a patient and providing care.
    - Innate Intelligence defined
    - What does our philosophy say about Intelligence
    - What is our role as chiropractors
    - How can our understanding of Innate Intelligence impact our analysis and care of patients

1 Hr. CE, Lecture, Philosophy **Kathleen Carten, DC**

9-10AM

- **Tools to Measure Adaptability**
  This course will discuss adaptation as it relates to chiropractic philosophy. We will make a practical connection as we look at how adaptability impacts a patient's overall health. We will then discuss how this can be analyzed in the chiropractic office and how chiropractic care can impact a person's ability to adapt to their environment.
    - Why adaptability matters in chiropractic philosophy
    - How it philosophy and adaptation relate to health
    - Tools to measure philosophy and adaptation
    - How philosophy and adaptation relates to clinical outcomes

1 Hr. CE, Lecture, Philosophy **Rob Sinnott, DC**

10-11:30AM

Philosophical application of the normal complete cycle

- A postgraduate review of the philosophical text of the "Chiropractic Textbook" and the presentation cycles of healing and adaptation for how the body works. We will dive into these at a deep level and explain how to use this philosophical knowledge in clinical practice when educating and providing care for patients.
    - Define the normal complete cycle in chiropractic philosophy
        - Steps of the normal complete cycle
        - How this can be explained to patients
        - How these steps come into play with clinic application

1.50 Hrs. CE, Lecture, Philosophy **Lyle Koca, DC**
