Speakers

Dean DePice, DC is a dedicated practicing DC since '88. His proven excellence at integrating research into daily practice sets a standard for all practicing doctors. He excels at breaking down complex wellness, evidence based, vitalistic and allopathic concepts into practical steps to better patients' lives through chiropractic.

Brice Jackson, DC, FACFN, FABBIR is a Life University graduate and Fellow of the American College of Functional Neurology and the American Board of Brain Injury Rehabilitation. He treats children and adults with neurological conditions including autism, ADHD, concussion, migraines, dizziness, and vertigo, and his team provides occupational therapy for the Virginia Institute on Autism.

Daniel Lane, BA (Adv), BS, DC, CCEP, DACNB, FABBIR, FABVR earned his Doctorate in Chiropractic from Logan College and holds an Advanced B.A. from the University of Manitoba. A board-certified Functional Neurologist, he specializes in traumatic brain injury, concussion, vestibular conditions, and neurological rehabilitation, with additional certifications in sports chiropractic, soft tissue therapies, laser therapy, and fibromyalgia.

Sherry McAllister, DC, MS (Ed), CCSP, FACC: As a practicing DC and the President of the Foundation for Chiropractic Progress, she has advocated for drug-free, evidence-based approaches to health. She is the host of the Adjusted Reality podcast, a series that shares conversations about health transformations and insights. Her new book, Adjusted Reality: Supercharge Your Whole-Being for Optimal Living and Longevity, challenges conventional thinking about health.

Leonard Siskin, B.A., D.C., has been in private practice in Green Brook, NJ since '99. He is a longtime member of the ICA, serving on its Rapid Research Review Committee, and has been involved with Chiropractic Biophysics (CBP) since '95. Dr. Siskin is the Secretary of Chiropractic Biophysics Nonprofit and an instructor for CBP seminars. He was named CBP Chiropractor of the Year in '07 and received the ICA Research Leadership Award in '08.

Ty Talcott, DC, CHPSE, specializes in ensuring the healthcare profession is protected and able to focus on healing people. He does this is by attending the national cybersecurity symposium every year in Washington D.C., where government enforcers share how they catch violators. Dr. Ty takes this information to develop his programs, and then conducts CE license renewal presentations in nearly every state.
