SurpraSegmental 2009 Brain Symposium

July 24-26, 2009, Life University, Marietta, GA

Dear Colleagues:

The history of the Chiropractic Profession has been grounded in Neurology since Harvey Lillard experienced a return of hearing after a spinal adjustment by DD Palmer. Modern day Chiropractors around the world have embraced the clinical applications of Functional Neurology, establishing training in this specialty as the most desired clinical educational program for the profession.

At the present time there are 28 extension facilities in all corners of the globe that train Chiropractors in Neurology at the Graduate level. The consequences of Chiropractic applications are not limited to the musculoskeletal system. Recent textbooks and research articles address the non surgical and non pharmaceutical approaches to brain based treatments that are central to the Chiropractic paradigm of health care.

Life University is hosting the profession's first Clinical Brain conference on its Marietta, Georgia campus from July 24-26. Appropriately named Suprasegmental 2009, the conference features the world's top clinicians in Functional Neurology and Chiropractic. Participants will be able to see them all and participate in presentations that will address Neurological Disorders that affect humankind from Childhood to the Elderly.

This is a passionate Conference and the Chiropractic Profession's first Brain Symposium and salute to the Neurological applications of Chiropractors from the beginning of the profession. The topics of presentation are those that reflect both the need of the Chiropractor and the public. They are exciting, demanding and richly explored by a faculty of experts never before assembled in such a fashion.

The Life University Suprasegmenatal Conference embraces the role of the Doctor of Chiropractic and the Nervous system of humankind. There is much to learn, much to share and much to bring back to the patient population served by all clinicians.

Suprasegmenatal 2009 will be the highlight of the clinical year and is designed for the practicing Chiropractor who desires to increase his/her understanding of

the majesty of the Nervous system. Participants will be able to serve humankind at a higher level subsequent to participating in this symposium.

I look forward to attending!

Frederick Carrick, DC, PhD

SupraSegmental 2009 Details
Friday, July 24, 2009

Opening Ceremony
Dr. Frederick Carrick and Dr. Guy Riekeman

Disconnected Kids and Case Studies
Dr. Robert Melillo and Dr. Peter Scire

3D Intelligence
Dr. Richard Barwell

Saturday, July 25, 2009

Neuroanatomy and Intelligence
Dr. Shad Groves

Practical Nutrition
Dr. Wally Schmitt

Hemisphericity: Disease of the Brain
Dr. John Donofrio

Debilitating Disorders
Dr. Sergio Azzolino

Movement Disorders
Dr. Frederick Carrick

Peripheral Nervous System Solutions
